

MESSAGEVAULT

Cell Phone Activity Monitoring Tool for Customers

BENEFITS

Calls

view date, time, duration, and number with a click of a button.

Texts

view date, time, and content of text messages. "Conversation Mode" sorts the text messages together, for simple conversation view.

Photos

view photos and share them with your friends on Facebook.

Videos

capture important moments and easily download them anywhere.

Additional Benefits

- View from anywhere with internet access
- Use any web browser
- Identify improper activities
- Easily reference and organize your cell phone activity
- No software required
- Keep all of your records even if you change handsets
- Review your activity even if your phone is off or out-of-network
- Save money by paying a small monthly fee vs expensive handset-based solutions
